

After over 30 years as a stage and production manager for large-scale opera, dance, theatre and festival events across Canada, I transitioned into my current role in theatre and facilities management as the full-time administrator of the Max Cameron Theatre in Powell River, BC. My years of hands-on experience have helped with the unique challenges in presenting the arts at a new school affiliated venue in a small remote community.

The Max is attached to Brooks Secondary School and we report directly to the Superintendent. This ensures that both school and community groups are well represented. I believe I have some helpful insights to offer in this area, and also in bringing quality programming to smaller communities.

The BC Touring Council has been instrumental in our growth during my four years here. Access to the block booking system over the past two of these years has led to continued success. Because of the hard work of the BCTC and those on its board, I have been able to present some high-quality performances. By standing for nomination to this board, I hope to have the opportunity to make a difference to other individuals and organizations as part of this group.
